

Flannel tape

Introduction

Dedicated to the wiring harness winding in the automotive industry. Using excellent substrates, high-quality strong adhesive tape, strong anti-aging ability. It has strong surface anti-fouling ability and high-temperature stability.

Specifications

»» Flannel tape

| No | ST-RB01 | |
|-------------------------|-------------------------------------|-------------------|
| Substrate | Material | Polyester cloth |
| | Colour | Black |
| | Glue | Hot melt adhesive |
| Specification | Length (m) | Optional |
| | Width (mm) | Optional |
| | Thickness (mm) | 0.3 |
| General characteristics | Tensile strength (N / cm) | 12 |
| | Elongation(%) | 20 |
| | Flammability rating | Class C |
| | Long-term temperature resistance °C | 105 |

»» Advantage

| | | |
|-------------------------|---------------------|---------------------------------------|
| 1.Strong adhesion | 2.Reduce noise | 3.Good temperature stability |
| 4.No harmful substances | 5.Not easy to wear | 6.Can be torn off by hand |
| 6.Anti-corrosion | 7.Soft and flexible | 8.Strong surface anti-fouling ability |

»» Uses

Dedicated to the wiring harness winding in the automotive industry. The soft base material makes this product particularly suitable for the production of automotive internal wiring harnesses, and it can also achieve the effect of reducing noise.

»» Range of use

This tape is mainly used for the automobile wiring harness. Easy to tear, waterproof and anti-aging. It can be flame-retardant and fire-proof, and it can be used for positioning around the car to reduce the vibration and noise of the car.
